Subject Index: Volume 36, 2003

Ablation
of atrial fibrillation, location of ectopic foci for, 33
of atrial flutter, atrial fibrillation after, 219
of AV junction, effect of QRS cancellation on, 243
failure and recurrence prediction in ventricular tachycardia and ectopy, 327
of ligament of Marshall, multiple electrical connections and, 53
localization of atriofascicular pathways for, 105
predicting intra-arterial conduction block after, 227
Accessory pathway
between LSVC and left atrium, 53
Action potential propagation
PSpice simulation of, 279
Activation mapping
of experimental ventricular fibrillation, 147
Acute myocardial infarction
QRS complexes caused by anasarca, 59
ST-segment depression in lead AVR, 11
Adrenergic stimulation
electrophysiological effects *vs.* mental stress, 301
Age
P-wave duration and dispersion, 321
Alternans
sarcoplasmic reticulum calcium ion pump and, 125
Alternating reversed Wenckebach periodicity
concealed electrotonic conduction and, 81
Ambulatory monitoring
nonlinear transformation of pNN50, 41
Anasarca
QRS complex amplitude with weight loss, 263
QRS complexes after AMI, 59
Anesthesia
induction agents, QT dispersion increase in CAD and, 99
VF with J waves in child with aortic coarctation, 339
Animal models
effect of vagus nerve on arterial electrical remodeling, 295
electrocardiographic findings in Chagasic heart disease, 155
sarcoplasmic reticulum Ca^{++} ion pump in alternans, 125
two-dimensional analysis of ventricular fibrillation, 147
Anterior ischemia
persistence of inverted T waves, 173
Antidromic tachycardia
atriovasicular pathway ablation for, 105
Aorta coarctation
VF with J waves during anesthesia, 339
Arrhythmias. *See also specific arrhythmias*
effect of QRS cancellation on detection, 243
recurrence, prediction of, 137
sarcoplasmic reticulum calcium ion pump and, 125
Arterial effective refractory period
vagus nerve effect on, 295
Arterial electrical remodeling
vagus nerve effect on, 295
Arterial vulnerability
atrial fibrillation after flutter ablation, 219
Arterioventricular block
alternating reversed Wenckebach periodicity and, 81
Asbestos exposure
impaired cardiac autonomic functions, 195
Atrial escape-capture bigeminy
in dominant atrial rhythm with 2:1 exit block, 349
Atrial fibrillation
after flutter ablation, 219
age-related P-wave duration and dispersion comparisons, 321
arterial remodeling, vagus nerve effects on, 295
in Brugada syndrome, cycle length-dependent repolarization in, 161, 165
ectopic foci, P wave morphology and, 33
ligament of Marshall catheter ablation for, 53
paroxysmal, electroanatomic mapping of atrium activation in, 237
P-wave duration and dispersion in, 251
QRS cancellation effects, 243
Atrial flutter ablation
atrial fibrillation after, 219
predicting intra-arterial conduction block after, 227
Atrial tachycardia
Ligament of Marshall catheter ablation for, 53
Atriofascicular pathway
localization and ablation using electroanatomic mapping, 105
Atrioventricular conduction variability
in coronary artery disease, 311
Atrium activation
electroanatomic mapping in paroxysmal atrial fibrillation, 237
Atypical Wenckebach periodicity
with bradycardia-dependent RBBB, 355
triple ATV junctional pathway and, 73
Autonomic nervous system
logit transformation of pNN50, 41
spontaneous coronary spasm and, 117

Beta-blocker
long-term effects in congestive heart failure, 111
Bipolar system
recording undetected P waves, 345
Body electrical resistance
augmentation in CHF with peripheral edema loss, 167
Body surface mapping
detection of exercise-induced myocardial ischemia, 89
Body weight
diminuation of QRS complexes caused by anasarca, 59
QRS complex amplitude in HD patient on anasarca, 263
Bradycardia-dependent block
with atypical AV Wenckebach periodicity, 355
Brody effect
QRS complex amplitude after HD, 263
Brugada syndrome
cycle length-dependent repolarization in atrial fibrillation, 161, 165
mimicked by profound hypothermia, 257, 261
VF with J waves in left precordial leads, 339

Calcium ion pump
contribution to electrical and mechanical alternans, 125
Cardiac conduction disturbance
during anesthesia in child with aortic coarctation, 339
Cardiac muscle action potential propagation
PSpice simulation of, 279
Catheter ablation. *See* **Ablation**
Chagas' disease
electrocardiographic findings in nonhuman primates, 155
Child
with aortic coarctation, VF with J waves during anesthesia, 339
with heart disease, EASI lead *vs.* 12-lead ECG waveforms, 25
Chloride channel
electrical and mechanical alternans and, 125
Concealed electronic conduction
alternating reversed Wenckebach periodicity and, 81
Conduction velocity
electroanatomic mapping in paroxysmal AF, 237
Congenital heart disease
waveform comparison of 12-lead ECGs vs EASI leads, 25
Congestive heart failure
long-term effects of beta-blocker in, 111
with peripheral edema, treatment augmentation of QRS complex, 167
QRS complex amplitude in HD patient on anasarca, 263
Coronary artery disease
atrioventricular conduction variability in, 311
inducible sustained VT, limited predictive value of, 205
intubation, QT dispersion increase during, 99
Cycle length-dependent repolarization
in atrial fibrillation Brugada syndrome, 161, 165
Cycle length variability
increase during ventricular fibrillation, 137

Diagnostic techniques
ST-segment depression in lead AVR in AMI, 11
Dominant atrial rhythm
with 2:1 exit block, in escape-capture bigeminy, 349

EASI lead system
precordial waveforms *vs.* standard leads, 179
waveforms compared with 12-lead ECGs in children, 25
Echocardiography
of Chagas' disease in nonhuman primates, 155
Ectopy
ablation failure and recurrence predictions, 327
Electrical connections
ligament of Marshall as catheter ablation target, 53
Electrical impedance
QRS complex amplitude in HD patient on anasarca and, 263
Electrical reactance
QRS complex amplitude in HD patient on anasarca and, 263
Electrical resistance
QRS complex amplitude in HD patient on anasarca and, 263
Electric field in junctional cleft
PSpice action potential propagation simulation and, 279
Electroanatomic mapping
localization and ablation of atriofascicular pathways, 105
of right atrium activation in paroxysmal atrial fibrillation, 237
Emergency situations
EASI lead system precordial waveforms *vs.* standard leads, 179
Epinephrine infusion
electrophysiological effects *vs.* mental stress, 301
Escape-capture bigeminy
in dominant atrial rhythm with 2:1 exit block, 349
Exercise-induced myocardial ischemia
detection of, 89

Gap junction connections
PSpice action potential propagation simulation and, 279

Healthy subjects
electrophysiological effects of mental stress *vs.* epinephrine, 301
Heart failure. *See also* **Congestive heart failure**
prediction in hypertrophic cardiomyopathy, 333
Heart period variability
nonlinear transformation of pNN50, 41
Heart rate variability
autonomic changes in spontaneous coronary spasm and, 117

prognostic value in hypertrophic cardiomyopathy, 333
time domain, asbestos exposure and, 195
time domain index, logit transformation of, 41
Heart transplant recipient
bipolar system recording undetected P waves in, 345
Hemodialysis
QRS complex amplitude augmentation, 263
High frequency events
in predicting heart failure in HCM, 333
His bundle longitudinal dissociation
atypical ATV Wenckebach periodicity and, 73
Holter monitoring
nonlinear transformation of pNN50, 41
Hypertrophic cardiomyopathy
prognostic value of heart rate variability, 333
Hypothermia
mimicking Brugada type ECG, 257, 261

Impedance
augmentation in CHF with peripheral edema loss, 167
Implantable cardioverter defibrillators
increased cycle length variability during VF, 137
monomorphic VT initiation and, 213
risk stratification, inducible sustained VT and, 205
Initiation
of monomorphic VT by implantable defibrillator, 213
Interstitial lung disease
environmental asbestos exposure and, 195
Intra-arterial conduction
atrial fibrillation after flutter ablation, 219
Intra-arterial conduction block
predicting after atrial flutter ablation, 227

J waves
with VF during anesthesia of child with aortic coarctation, 339

Late potentials
VT/VF in postinfarction patients and, 17
Lead AVR
ST-segment depression in acute myocardial infarction, 11
Left superior vena cava
persistent, electrical activity in, 53
Left ventricular dysfunction
recovery time dispersion after MI and, 1
Left ventricular ejection fraction
ventricular tachycardia prediction and, 205
VT/VF in postinfarction patients and, 17
Ligament of Marshall
catheter ablation for atrial tachycardias, 53
LOGIT50
nonlinear transformation of pNN50, 41
Low voltage ECG
caused by anasarca after AMI, 59

Mental stress
electrophysiological effects of, 301
Myocardial infarction
LV dysfunction after, increased recovery time dispersion and, 1
postinfarction QT variablity and signal-averaged electrocardiogram, 17
QRS complexes caused by anasarca, 59
reperfusion, reconstruction of unmeasurable ST-deviation, 187
ST-segment depression in lead AVR, 11
Myocardial ischemia
exercise-induced, detection of, 89

Pacing lead malposition
right bundle branch block pattern during permanent RV pacing, 67
Parasympathetic nervous system
logit transformation of pNN50, 41
Paroxysmal atrial fibrillation
electroanatomic mapping of right atrial activation in, 237
Peripheral edema
diminuation of QRS complexes caused by anasarca, 59
loss in CHF, QRS complex augmentation and, 167
QRS complex amplitude on anasarca after HD, 263
pNN50
logit transformation of, 41
Power spectrum
atrial fibrillary wave characteristics, 243
Prehospital ECG
EASI lead system precordial waveforms *vs.* standard leads, 179
Prognosis
heart rate variability in hypertrophic cardiomyopathy, 333
Proximal left anterior descending artery occlusion
electrocardiographic manifestations of, 173
PSpice simulations
of action potential propagation, 279
Pulmonary vein ectopy
detection by P wave morphology, 33
Pulmonary vein pacing
P wave morphology, 33
PV pace mapping
of focal atrial activity from non-sinus sites, 33
P-wave dispersion
age comparisons of, 321
long-term effects of beta-blocker in congestive heart failure, 111
in short-term *vs.* long-term atrial fibrillation, 251
P-wave duration
age comparisons of, 321
long-term effects of beta-blocker in congestive heart failure, 111
in short-term *vs.* long-term atrial fibrillation, 251
P waves
recorded in bipolar system in heart transplant recipient, 345
during spontaneous and paced pulmonary vein activity, 33

QRS cancellation
effects on AF wave signal characteristics, 243
QRS complexes
amplitude augmentation in hemodialysis, 263
augmentation, peripheral edema treated for CHF, 167
diminuation caused by anasarca after AMI, 59
QT dispersion
increase during intubation in CAD, 99
QT variability
in postinfarction ventricular tachycardia, 17

Radiofrequency catheter ablation. *See* **Ablation**
Reactance
augmentation in CHF with peripheral edema loss, 167
Recovery time dispersion
after MI, LV dysfunction and, 1
Recurrence
of arrhythmias, prediction of, 137
inducible sustained VT predictive value in CAD, 205
prediction after ablation in RVOT VT/ectopy, 327
Reperfusion
for MI, reconstruction of unmeasurable ST-deviation, 187
Repolarization abnormalities
LV dysfunction and, 1
Research methods
LOGIT50 Index, 41
Right bundle branch block
bradycardia-dependent with atypical AV Wenckebach periodicity, 355
pacing morphology during permanent RV pacing, 67
Right ventricle
electroanatomic mapping to ablate atriovasicular pathways, 105
Right ventricular outflow tract tachycardia
ablation failure and recurrence predictions, 327

Sarcoplasmic reticulum
calcium ion pump contribution to alternans, 125
Sick sinus syndrome
variant, 349
Signal processing
effect of QRS cancellation on atrial fibrillary waves, 243
of experimental ventricular fibrillation, 147
Smooth muscle action potential propagation
PSpice simulation of, 279
Spontaneous coronary spasm
autonomic changes in, 117
Statistical issues
nonlinear transformation of pNN50, 41
ST-segment depression
in lead AVR in acute myocardial infarction, 11
ST-segment reconstruction
in missing leads on 12-lead ECG, 187
ST-T integral
detection of exercise-induced myocardial ischemia, 89
Sudden cardiac death
VF with J waves in left precordial leads, 339
Surgical ablation. *See* **Ablation**

Thiopental-etomidate
QT dispersion increase during induction in CAD patient, 99
Thrombolysis
ST-segment resolution during, 187
Triple atrioventricular junctional pathway
atypical ATV Wenckebach periodicity and, 73
Trypanosoma cruzi
electrocardiographic findings in nonhuman primates, 155
T-wave amplitude
detection of exercise-induced myocardial ischemia, 89
T-wave inversions
in precordial leads after chest pain resolution, 173
12-lead ECGs
missing leads, ST-segment reconstruction on, 187
precordial waveforms *vs.* EASI lead system, 179
in predicting intra-arterial conduction block after atrial flutter ablation, 227
waveforms compared with EASI leads in children, 25

Vagus nerve
effect on arterial electrical remodeling, 295
Variant angina
autonomic changes in, 117
Ventricular arrhythmias
LV dysfunction after MI and, 1
Ventricular fibrillation
cycle length variablity increase, 137
with J waves during anesthesia in child with aortic coarctation, 339
two-dimensional analysis in guinea pig, 147
Ventricular pacing
right bundle branch block pattern during, 67
Ventricular tachycardia
ablation failure and recurrence predictions, 327
inducible sustained, limited predictive value of, 205
monomorphic, implantable defibrillators and, 213
with QT variability and signal-averaged electrocardiogram, 17

Wavelet transformation analysis
of HR variability in spontaneous coronary spasm, 117
Wellen's syndrome
proximal left anterior descending artery occlusion and, 173
Wolfe-Parkinson-White syndrome
persistent left superior vena cava, electrical activity in, 53
